ROBERT ALLAN BOLISTA

FULL-STACK SOFTWARE DEVELOPER / BI DEVELOPER

London, ON / (647) 470-0157 / robert.bolista@gmail.com / linkedin.com/in/robert-allan-bolista / github.com/rabolista / rabolista.com

PROFESSIONAL SUMMARY

Two tracks, run in parallel for a decade. 15+ years in business intelligence and data engineering — SQL Server and Oracle, T-SQL and PL/SQL, SSIS ETL, Power BI, and enterprise integration across JD Edwards and Cognos — for retail, manufacturing, telecom, insurance, and financial-services clients, currently as de facto technical lead on an internal platforms team. Alongside it, almost 10 years as a freelance mobile and web developer: ten apps published on the Apple App Store and six on Google Play, independently designed and built since 2016, plus full-stack web platforms in React, React Native, TypeScript, ASP.NET, and Laravel on PostgreSQL and SQL Server backends. The combination means one person who can model the data, build the service, and ship the client.

CORE SKILLS

BI & DATA	SSIS ETL pipelines, data warehousing, Power BI, Cognos, dimensional modelling, query and index tuning, reconciliation and data-integrity processes
LANGUAGES	C#, Go, Python, JavaScript, TypeScript, PHP, SQL
FRAMEWORKS & WEB	ASP.NET (WebForms), Laravel, Angular, React, jQuery
DATABASES	SQL Server (T-SQL, stored procedures, performance tuning), Oracle/PL-SQL, DB2, AS400, PostgreSQL, MySQL
MOBILE	Flutter, React Native, Swift, Ionic — apps published on App Store and Google Play
INTEGRATION	JD Edwards, Cognos, ERP data integration, system-to-system integrations
TOOLS & PRACTICES	Git/GitHub, TFS, Docker, Agile/Scrum, Power BI, SSIS (ETL)

PROFESSIONAL EXPERIENCE

Business Intelligence / System Application Developer — SEP 2021 — PRESENT

Freelance Mobile & Web Developer — 2016 — PRESENT

BI Support Developer — MAR 2019 — MAY 2021

Web Application Developer / Application Support — SEP 2015 — MAR 2019

Application Developer, Oracle / Backend Developer — APR 2012 — MAR 2015

IT Consultant — Database & Application Development — JUN 2005 — MAR 2012

SELECTED PROJECTS

Christianster.net — full-stack social platform
Web plus iOS and Android, with real-time chat, community forums, and Faith AI, an assistant answering biblical questions. Built in React, React Native, and TypeScript on a PostgreSQL backend — schema design, API architecture, and cross-platform mobile release.

rabolista.com — interactive portfolio
Self-directed React project designed and built as a desktop-style interactive portfolio.

Toronto Crime Prediction — capstone
ML pipeline in Python — feature engineering, linear regression, ensemble models — on Toronto open-data crime indicators, visualized with Matplotlib and Seaborn.

EDUCATION & CERTIFICATIONS

Professional Certificate in Data Science — University of Waterloo MAY 2025 — SEP 2026
Certified Data Science

Bachelor of Science in Computer Science — Adamson University, Manila

IBM Data Engineering Foundation Specialization, including Data Engineering Essentials

Data Warehouse Fundamentals · Database & SQL for Data Science with Python (Coursera)

Scrum Master Certification · Git & GitHub Essentials

Google AI Essentials · IBM Generative AI Essentials
