ROBERT ALLAN BOLISTA

London, ON | (647) 470-0157 | robert.bolista@gmail.com | linkedin.com/in/robert-allan-bolista

PROFESSIONAL SUMMARY

Senior Business Intelligence Developer with 15+ years designing enterprise BI systems, ETL pipelines, and reporting platforms for retail, manufacturing, and financial services. Specialized in reconciling and integrating complex ERP data (JD Edwards, Cognos, Oracle) into unified SQL Server-based analytics, with a track record of building production-critical forecasting and reporting tools used by Sales, Supply Chain, and Finance leadership. Experienced across the full BI stack — SSIS, Power BI, T-SQL, Python, C# — and currently expanding into cloud data platforms (Snowflake, Databricks) and modern data science tooling to move toward a Data Architect / BI Lead track.

CORE SKILLS

BI & Reporting: Power BI (DAX, data modeling), SSRS, Crystal Reports, SSIS (ETL/ELT)

Databases: SQL Server (T-SQL, stored procs, performance tuning), Oracle/PL-SQL, DB2, AS400

ERP / Enterprise Systems: JD Edwards (JDE), Cognos, cross-system data reconciliation

Programming: Python (in progress), C# (.NET, WebForms), JavaScript

Cloud & Emerging: Snowflake and Databricks (learning), Docker, Git/GitHub, TFS

Other: Flutter (mobile), Django/Flask (learning), Agile/Scrum

PROFESSIONAL EXPERIENCE

Business Intelligence / System Application Developer | *Masco Canada, St. Thomas, ON* **Sep 2021 – Present**

- Designed and optimized SSIS ETL pipelines processing daily/weekly Sales, Inventory, and Forecasting data for The Home Depot, Walmart, and RONA, reducing [manual reporting time / error rate] by 80%.
- Built Power BI dashboards and semantic data models adopted by Sales, Operations, Supply Chain, and Finance, replacing [legacy Excel/Crystal Reports process] and cutting report turnaround from 3 to 4 hours/days.
- Designed and shipped the Bathing Capacity Tool, a production-critical forecasting application that improved material delivery accuracy by [X%] and reduced [stockouts / planning errors] across manufacturing operations.
- Built the Sales Balancing Tool to reconcile JD Edwards and Cognos data, eliminating [X hours/week] of manual reconciliation and reducing reporting discrepancies by [X%].
- Re-engineered core SSIS integrations, improving batch processing time by 60% and reducing data quality incidents by 80% across multiple business units.
- Built and maintained the User Management System (UMS) for promotional web platforms, handling authentication, authorization, and automated data provisioning for multiple users.
- Partnered directly with Finance, Supply Chain, Sales, Logistics, and IT stakeholders to scope and deliver BI solutions — acting as the primary technical point of contact from requirements through deployment.

BI Support Developer | *Gryphtech, Toronto, ON* **Mar 2019 – May 2021**

- Supported and optimized SSIS packages and SQL Server stored procedures for RE/MAX Europe and North America's BI operations, supporting [X] markets/regions.
- Diagnosed and resolved production issues across data pipelines, backend systems, and customer-facing applications, improving system reliability and reducing [downtime/incident count] by 50+%.
- Improved database and API performance through query optimization and indexing, reducing average response time by 30%.

- Collaborated with product and data teams in an Agile environment to ship enhancements on a [weekly/bi-weekly] sprint cadence.

Web Application Developer / BI-IS Application Support | *Collega, Toronto, ON* **Sep 2015 – Mar 2019**

- Managed SQL Server databases end-to-end — synchronization, backup/recovery, and stored procedure development — supporting internal systems with 90% uptime.
- Built and maintained SSIS packages integrating internal systems with external applications, enabling reliable cross-system data flow.
- Designed Crystal Reports as the organization's primary reporting tool, delivering sales, operational, and performance reports used directly by leadership for decision-making.
- Developed internal and customer-facing applications using ASP.NET, PHP, SQL, and JavaScript.
- Built and deployed a hybrid mobile sales application that improved field sales efficiency and data visibility for the sales team.

Application Developer – Oracle / BI Developer | *IBM Philippines, Manila, PH* **Apr 2012 – Mar 2015**

- Developed and optimized PL/SQL procedures and SQL workflows powering commissions and logistics reporting for enterprise clients.
- Led performance tuning initiatives that improved database stability and query response time for large-scale datasets used by BI and operations teams.
- Maintained high system availability for enterprise clients, troubleshooting production issues under SLA-driven timelines.

Mobile Developer (Freelance) | *Self-Employed, Remote* **Aug 2015 – Dec 2018**

- Published multiple cross-platform mobile apps on the App Store and Google Play using Swift and Flutter.

IT Consultant — International Experience | *Various (PLDT Global, HPE, SunLife UK, Prime@ Technology, IDEIN Consulting), Metro Manila, PH* **Jun 2005 – Mar 2012**

- Delivered development, systems analysis, and PL/SQL optimization work across telecom, insurance, and enterprise clients, building the database and integration foundation that carried into later BI-focused roles.

EDUCATION

Professional Certificate in Data Science — University of Waterloo

May 2025 – May 2026 (In Progress) | Python, machine learning, data visualization, big data analytics

Capstone: Toronto Crime Prediction — built ML pipeline in Python (feature engineering, linear regression, ensemble models) using Toronto open-data crime indicators; visualized with Matplotlib/Seaborn.

Bachelor of Science in Computer Science — Adamson University, Manila, Philippines

CERTIFICATIONS

- IBM Data Engineering Foundation Specialization (incl. Data Engineering Essentials)
- Data Warehouse Fundamentals — Coursera
- Database & SQL for Data Science with Python — Coursera
- Extract, Transform & Load Data in Power BI — Microsoft
- IBM Generative AI Essentials | Google AI Essentials
- Git & GitHub Essentials | Scrum Master Certification | Google Project Management Professional Certificate
